stable.

ADHD & FOCUS PRODUCTIVITY PLATFORM

Investment Opportunity · 2026

CONFIDENTIAL · FOR QUALIFIED BUYERS ONLY

THE PROBLEM

Most productivity apps fail ADHD brains.

366M

ADULTS WITH ADHD GLOBALLY

The most underserved segment in the productivity market.

~Zero

APPS BUILT SPECIFICALLY FOR THEM

Todoist, Notion, Asana overwhelm ADHD users with too much complexity.

71%

ABANDON GENERAL PRODUCTIVITY APPS WITHIN 30 DAYS

Too many features. Too much friction. Not built for ADHD brains.

THE SOLUTION

stable. — the focus app built for ADHD adults.

- **Three tasks. That's it.** — radical simplicity ADHD brains love
- **AI insight card** — personalised daily coaching, no setup needed
- **Task categories** — Work, Personal, Family, Health, Other
- **Focus sessions** — built-in timer with full session history
- **Smart reminders** — snooze, dismiss, recurring
- **Light + Dark mode** — polished, professional design
- **Web + Mobile (Expo)** — works on every device

MARKET OPPORTUNITY

A $25 billion market with no clear winner.

366M

ADULTS WITH ADHD GLOBALLY

Primary audience. Underserved, high-intent, willing to pay for solutions.

$25B

ADHD MANAGEMENT MARKET BY 2030

Growing 8.4% CAGR. Digital tools are the fastest-growing segment.

$85B

GLOBAL PRODUCTIVITY APP MARKET BY 2027

Broader market stable. competes in with a sharp niche angle.

~10%

OF ALL ADULTS HAVE ADHD-ADJACENT TRAIT

Even non-diagnos users who struggl with focus are the target.

No dominant player in ADHD-specific productivity. Closest competitors (Focusmate, Inflow) are single-feature or coaching-only. stable. is the only AI-powered, full-stack focus OS for ADHD adults.

PRODUCT STATUS

Built, deployed, ready to scale.

✅ Web App — LIVE

Next.js 15 deployed on Vercel. Full auth (Clerk), PostgreSQL database (Supabase), type-safe real-time API (tRPC). All 4 core features complete and tested.

🚧 Mobile App — In Development

React Native (Expo). Shares the same design system and API. Full iOS + Android support. Included in handover.

TECH STACK

- Next.js 15 + TypeScript — modern scalable frontend
- tRPC + React Query — fully type-safe API layer
- Supabase (PostgreSQL) — managed, scales instantly
- Clerk — enterprise-grade user authentication
- Vercel — zero-config global deployment
- Expo (React Native) — iOS + Android from one codebase
- pnpm monorepo — shared code across web and mobile

MONETISATION MODEL

Four tiers. Freemium to enterprise.

FREE

£0

forever

- 3 active tasks
- 1 focus session/day

£6.99

per user/month · min 5 seats

- Everything in Pro
- Team dashboard
- Admin controls
- Invoiced billing
- ADHD-aware onboarding

Annual plan saves ~16% · drives higher LTV and lower churn · App Store + Google Play + direct web billing

REVENUE PROJECTIONS

£1M+ ARR reachable within 36 months.

MILESTONE	PAID USERS	AVG REVENUE	ANNUAL REVENUE
Month 6	200	£7.99/mo	**£19,200**
Year 1	600	£7.99/mo	**£57,500**
Year 2	3,000	£8.50/mo	**£306,000**
Year 3	**10,000**	**£8.99/mo**	**£1,080,000**

Projections based on organic growth via App Store SEO and ADHD communities. No paid ads assumed in Year 1.

Growth channels

App Store SEO, ADHD subreddits, TikTok + Instagram ADHD community. No paid ads needed in Year 1.

~95% gross margin at scale

SaaS infrastructure costs ~£400/mo at 10,000 users. Almost pure profit beyond that point.

Low churn expected

Target <4% monthly churn. ADHD users who find a system that

works stay
loyal.

COMPETITIVE LANDSCAPE

No one owns this space yet.

Todoist / Any.do

General productivity apps. Complex, feature-heavy, not designed for ADHD. No AI coaching. No emotional design.

✕ Not built for ADHD

Focusmate

Body-doubling video sessions only. Single feature, no task management, no AI, no reminders. Completely different use case.

✕ Single feature only

Inflow / Numo

ADHD coaching apps. Heavy on content, light on execution tools. Very expensive (£40–60/mo). No task + focus integration.

✕ Coaching only, overpriced

🏆

stable. — the only AI-powered ADHD focus OS

Full task management + AI daily coaching + focus sessions + reminders. One app. One price. Built for ADHD brains from day one.

WHAT YOU'RE BUYING

Everything. Turnkey. Ready to launch.

- Full source code (pnpm monorepo — web + mobile)
- Web app deployed on Vercel (production-ready)
- Supabase database with full schema and migrations
- Clerk authentication — user management, billing-ready
- stable. brand assets — logo, wordmark, full colour system
- Design system + all approved mockups (web + mobile)
- Expo mobile app codebase (in development, handed over)
- All 4 features live: Tasks, Focus, Reminders, Dashboard
- tRPC API — fully typed, easy to extend with new features
- Stripe-ready billing integration points (easy to wire up)
- 30-day handover support from original developer
- Full documentation and implementation plans

INVESTMENT ASK

Own a platform with £1M+ ARR potential.

£65,000

Asking price · one-time payment

£1.08M
YEAR 3 PROJECTED ARR

~95%
GROSS MARGIN AT SCALE

16×
ROI ON £65K BY YEAR 3

0
TECHNICAL DEBT

Why £65k is a bargain

Year 3 revenue projection of £1.08M ARR = 16× return on investment. Equivalent to hiring one developer for 8 months — except you get a finished, deployed product.

Payment options

Full payment · or 50% upfront + 50% at 6-month milestone (£5k MRR). Open to discuss terms.

stable.
